CHAPTER 23 FUNGI

Section 23.2 The Diversity of Fungi

Order the Steps

The figure below shows the steps in the mushroom life cycle. Write the numbers from the figure in front of the descriptions of the life-cycle steps below.

- _____ Mushrooms develop.
- _____ Mushrooms release spores.
- _____ Meiosis in basidia produces spores.
- _____ Spores grow threadlike hyphae in the ground.
- _____ Two strains of hyphae join.
- _____ Basidia form.

Title: Cellular Biology Workbook

Number Of Printable Pages: 35

Description This biology workbook introduces students to animal and plant cells. The workbook begins with identifying and understanding life functions. It progresses on to cellular organelle identification and function. The work also serves as an introductory to cell division (mitosis). Comes complete with cellular crossword puzzles, graphic organizers, a review quiz, and word searches. The compilation includes fun activities and materials for a hands-on cellular experience including: -Making a Jell-O Cell -Observing Mitosis -Microscope Introduction -Building a Cellular Community

Term	Meaning
Cell	The basic unit of life.
Cell membrane	The boundary of the cell.
Cytoplasm	The fluid inside the cell.
Nucleus	The control center of the cell.
Chromatin	The material of which chromosomes are made.
Chromosome	A structure of DNA and protein that carries genetic information.
Centrioles	Two cylindrical structures that form the mitotic spindle.
Mitochondrion	An organelle that converts energy from food into a form that the cell can use.
Endoplasmic reticulum	A network of membranes that transport materials within the cell.
Golgi apparatus	An organelle that packages and transports materials.
Lysosome	An organelle that breaks down waste materials.
Vacuole	A fluid-filled sac that stores materials.
Plasma membrane	The boundary of the cell.
Cell wall	The rigid outer layer of a plant cell.
Chloroplast	An organelle that converts light energy into chemical energy.
Stroma	The fluid inside the chloroplast.
Thylakoid	A membrane-bound structure that carries out photosynthesis.
Granum	A stack of thylakoids.
Photosynthesis	The process by which plants convert light energy into chemical energy.
Respiration	The process by which cells convert chemical energy into a form that the cell can use.
ATP	A molecule that stores and transfers energy.
Glucose	A simple sugar that provides energy for the cell.
Oxygen	A gas that is produced by photosynthesis and used in respiration.
Carbon dioxide	A gas that is used in photosynthesis and produced in respiration.

Mitosis in plants worksheet answer key. How does mitosis work in plants. Why is mitosis important in plants. Mitosis in plants worksheet answers. Example of mitosis in plants. What is mitosis in plant cells.

Mitosis worksheets along with cell cycle and cell division worksheets for high school, middle school, and elementary school life science teachers. The mitosis worksheet lets students review the phases of the cell cycle and their purposes. NGSS Life Science offers many great lessons. Click the Free Lesson Plan (PDF) link below or become a member to get access to the answer key and editable file. Free mitosis curriculum includes: Mitosis Worksheet Free Lesson Plan (PDF) Lesson Plan (DOCX) & Answer Key with Membership High School Worksheet Students will gain introductory knowledge of the cell cycle in this mitosis worksheet. Students in this mitosis worksheet will learn what the cell is doing in each phase of cell division, mitosis, and the stages of mitosis. NGSS Standard HS-LS1-4 Published by NGSS Life Science Plant Growth Germination Lab Free Lesson Plan (PDF) Lesson Plan (DOCX) & Answer Key with Membership High School Lab The goal of this basic lab is break the misconception that photosynthesis is how plants grow. Students should also learn that plants grow by cell division. Students will be able to move past the misconception that plants use photosynthesis, not cell division, to grow. NGSS Standard HS-LS1-4 HS-LS1-5 Common Core StandardRST 9.10.3, 9.10.5, 9.10.7, WST 9.10.1b, 9.10.1e, 9.10.2a, 9.10.7, 9.10.9 Published by NGSS Life Science Mitosis Quiz Question Bank Free Lesson Plan (PDF) Lesson Plan (DOCX) & Answer Key with Membership High School Test The mitosis quiz question bank includes the cell cycle, G1 phase, S phase, G2 phase, mitosis, G0 phase, cell cycle regulation, signal molecules, and cancer. You can use the question bank to build assessments, and active membership is required to view questions. NGSS Standard HS-LS1-4 Published by NGSS Life Science Cell Cycle Flipbook Project Free Lesson Plan (PDF) Lesson Plan (DOCX) & Answer Key with Membership High School Project In this cell cycle project, students learn about the cell division by creating a paper flipbook animation that models interphase, mitosis and cytokinesis. Students draw the phases of the cell cycle on each index card, labeling specific structures in the cell and chromosome numbers. You can easily convert this project into a meiosis flip book. NGSS Standard HS-LS1-4 Published by NGSS Life Science Stem Cell Lab Free Lesson Plan (PDF) Lesson Plan (DOCX) & Answer Key with Membership High School Lab Students will practice designing their own experiment. Students will experience pluripotent stem cells by watching a stem grow roots. Students should also recognize that plants grow by cell division. NGSS Standard HS-LS1-4 Common Core StandardRST 9.10.3, 9.10.7, WST 9.10.1e, 9.10.2f, 9.10.7 Published by NGSS Life Science Chromosome Modeling Lab - Mitosis, Meiosis and Fertilization Free Student Handout Free Teacher Notes High School Lab In this chromosome modeling lab, students create pairs of socks models of chromosomes to model the processes of mitosis, meiosis, and fertilization. Students also build a foundation about meiosis and fertilization and how it relates to genetics and genetic disorders. NGSS Standard HS-LS1-4 HS-LS3-1 HS-LS3-2 Published by Ingrid Waldron and Jennifer Doherty Diploid vs Haploid Worksheet Free Lesson Plan (PDF) Lesson Plan (DOCX) & Answer Key with Membership High School Worksheet In this meiosis chromosome worksheet, students answer questions about the number of chromosomes generated by either mitosis or meiosis. Haploid and diploid chromosome numbers help students understand the reproduction type used in each process. NGSS Standard HS-LS1-4 HS-LS3-1 HS-LS3-2 MS-LS3-2 (Types of Reproduction) Published by NGSS Life Science Understanding Cancer Free Multimedia Free Teacher Notes High School Multimedia This is a great information webpage about what is cancer, the kinds of cancer, screening methods, causes, oncogenes, tumor suppressor genes, and so much more. The teacher notes is about myths and misconceptions around commonly asked questions about cancer. NGSS Standard HS-LS1-4 HS-LS3-2 HS-LS3-3 Published by National Cancer Institute Mitosis Microscope Lab Free Lesson Plan (PDF) Lesson Plan (DOCX) & Answer Key with Membership High School Lab In this mitosis lab, students will observe plant cells in the different phases of the cell cycle, including interphase, mitosis, and cytokinesis. This mitosis microscope lab is a great lab to help students practice their microscope skills, including focusing and the field of view. NGSS Standard HS-LS1-4 MS-LS3-2 (Types of Reproduction) Published by NGSS Life Science Cell Cycle Topics Cell Cycle - somatic cells, interphase, mitosis, cytokinesis. Interphase - G1, S, G2. Mitosis - prophase, metaphase, anaphase, telophase. Cell Cycle Regulation - surface-to-volume ratio, checkpoints, external signals. Binary Fission - asexual reproduction, circular DNA copied, cell divides. Cancer - Proto-onco genes, tumor-suppressor genes. Lessons Organized by NGSS Standard
